1. In response to the Office action dated February 20, 2004 the Response pursuant to 37 C.F.R. 1.111 has been received May 19, 2004.

Claims 1-18 and 20-22 are currently pending in this application.

Response to Arguments

 Applicant's arguments, see pages 7-11, filed May 19, 2004, with respect to claims 1-18 and 20-22 have been fully considered and are persuasive.
 The rejection of claims 1-18 and 20-22 have been withdrawn.

Allowable Subject Matter

3. Claims 1-18 and 20-22 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1-7 are allowed because prior art fails to teach or make obvious a radiographic imager having a measuring device for determining the distance between an x-ray source and an image receptor associated with the radiographic imager, comprising: a circuit connected to a radiated signal source and a detector, the circuit operative to determine the travel time of a radiated signal between the x-ray source and the image receptor, and thereby determine the distance between the x-ray source and the image receptor as claimed in claim 1. Claims 2-7 are allowable by virtue of their dependence.

Art Unit: 2882

Claims 8 and 9 are allowed because prior art fails to teach or make obvious a method of determining the distance between an x-ray source and an image receptor associated with a radiographic imager, comprising projecting and detecting a radiated signal from one of the x-ray source or the image receptor associated with said radiographic imager, and determining the distance between the x-ray source and image receptor based on the travel time of the radiated signal as claimed in claim 8. Claim 9 is allowed by virtue of its dependence.

Claims 10-16, 21 and 22 are allowed because prior art fails to teach or make obvious a radiographic imager, comprising: a collimator housing containing a radiation beam source; and a measuring device operative to directly determine the distance between the collimator housing and an image receptor by calculating the travel time of a radiated signal directed from a radiated signal source to a detector as claimed in claim 10. Claims 11-16, 21 and 22 are allowable by virtue of their dependence.

Claims 17, 18 and 20 are allowed because prior art fails to teach or make obvious a radiographic imager, comprising: a radiated signal source for directly determining the distance between an image receptor and an x-ray source as claimed in claim 17. Claims 20 and 21 are allowable by virtue of their dependence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2882

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irakli Kiknadze whose telephone number is 571-272-2493. The examiner can normally be reached on 9:00- 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ed Glick can be reached on 571-272-2490. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
